

ELK RIVER CASE STUDY

Challenge

“Our program includes 100 staff working across 9 sites. Many of our staff work additional jobs. Trying to schedule training was extremely complicated and rarely had full attendance. Offering multiple trainings wasn’t cost effective.”

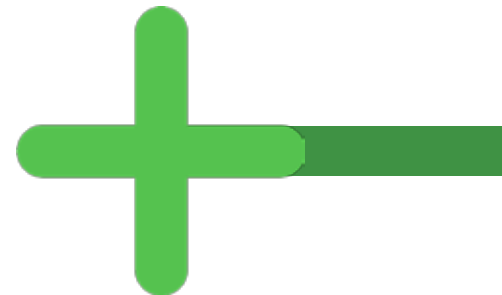

Solution

“We’ve found our partnership with CypherWorx has been well received from our staff to meet their schedule flexibility, and praised for the high quality content.”

Benefits

“Our Professional Development Committee has developed a model where each year specific modules are assigned to all staff, the remaining required hours are available for staff to choose what interests them most. Our staff have loved the flexibility, and are reporting more on-site conversations and implementation about their learning from completed modules.”

- Cory Franson, Assistant Director, Elk River, District 728 -
